

# BASKET STRAINERS

## Description:

Basket Strainer is a strainer with an ease of opening and cleaning of the filter screen. Basket strainers provide efficient straining solution for water, sea water, oil, paint or a variety of food or chemical products.

## Special Features of Indoanushka Basket Strainers :-

- ✓ The Indoanushka Basket Strainer is specially designed for outside to inside flow so as to enable the unwanted particles to get collected at the bottom of the strainer and can be removed online by draining from the connection given below.
- ✓ This prevents the frequent loss of time for removing the basket and cleaning it.
- ✓ They are relatively inexpensive compared to the down time, products or loss of production if they were not doing their job in a piping system.

### Screen Details:

Fitted as standard with a S.S screen having perforation of 1.2 mm dia. And other perforations are available on request.

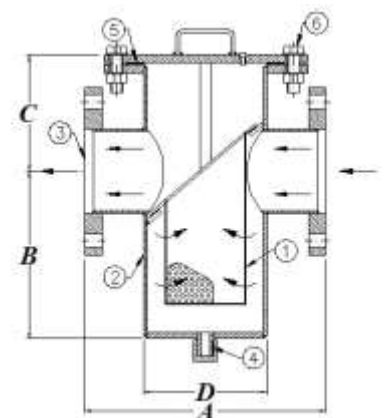

### Limiting Conditions:

Max. Operating pressure 10 bar.  
 Max. Operating temp. 180°C.
